Leishmania: Collaborative Research Opportunities in North Africa and the Middle East

The National Institute of Allergy and Infectious Diseases of the National Institutes of Health within the U.S. Department of Health and Human Services is sponsoring a conference entitled “Leishmania: Collaborative Research Opportunities in North Africa and the Middle East” on June 22-25, 2009 in Tunis, Tunisia, in collaboration with Institut Pasteur de Tunis.

The goal of this meeting is to bring together regional and international scientists with expertise in Leishmania in the Middle East and North African (MENA) region to stimulate new or expanded scientific exchange, research training, and collaborative research projects. There will be scientists from 13 countries in the Middle East and North Africa plus those from the United States.
